

In our latest corporate social responsibility initiative this week, we hosted our **2021 FREE Mental Health & ResilienceAWARE Virtual Roadshow**, in response to the immense support we gained from delegates and companies from our [2018 and 2019 events](#).

And what's more, the lockdown wasn't going to stop us! With our newly launched **AWARE Series TV**, we delivered the free courses to a professional standard to delegates across the UK, receiving commendable feedback.

Remember – It's not just vehicles that breakdown! To check out all our latest community mental health & all our other CSR activities, follow the [Network Training Partnership Facebook Group](#), and our [brand-new CSR page](#) on our company website.

“Although I felt that my understanding was quite high due to the number of years dealing with all my staff's work and home problems, I feel that I have learnt much more now that I can use to help them in the future. Very informative and helpful, the course was what I needed to improve my understanding. Thank you very much.”

“A really good insight into mental health issues that I will take onboard when I re-join the haulage industry. Great to actually have a zoom session that was enjoyable. Many thanks to Gary for offering me the chance to be on the course through a Recovery Mechanics page on Facebook. Arte et Marte”

“Brilliant, the whole content is relevant and flows, I absolutely loved it. Long overdue for the industry and thank you to all involved in the development and delivery.”
